Year	Discipline		
2	Information Technology		

Objectives

The main objective of this course is to give students an introduction to the basic syntax and morphology of the Arabic language so that they can study the language at an advanced level on their own. At the end of the course students will be in a position to understand simple Arabic sentences and decipher the meaning of complex sentences to some extent with the help of a dictionary. Although the main stress shall be on explaining the sentence structure, it is expected that some use of Situational Language Teaching (SLT) and communication will also give the students a limited ability to read Arabic texts and communicate in that language. The following topics will be covered in the course:

Prerequisites
None

Text Book
